

CHECK YOUR GFCIs EVERY MONTH.

Be absolutely certain that your Ground Fault Circuit Interrupters (GFCIs) are operating correctly. Plug a nightlight or a similar device into a receptacle when conducting the following test.

- 1** Push the red reset button. **2** Plug in the light and turn it on.

- 3** Push the black test button. Light should go off. **4** Push the red reset button. Light should go on.

Replace all GFCIs that fail the test!
